

Village of Gilberts
73 Industrial Drive
Gilberts, IL 60136

The Village of Gilberts proudly supplies millions of gallons of safe, clean water every day to our customers. Our water quality exceeds the standards established by United States Environmental Protection Agency (EPA) and Illinois Environmental Protection Agency (IEPA) Regulations.

Per the IEPA, we must perform a "survey" of all water customers every other year to help protect our water systems. This is NOT an optional survey.

Our program management firm of Aqua Backflow has helped us with our green initiative and created an eco-friendly online survey form for you to complete. It takes only a few moments and there is no cost to you.

Please visit TrackMyBackflow.com within 30 days. Click on the Forms tab. Click on Illinois. Enter your Site ID # «SiteID» and complete the questionnaire.

THANK YOU for your cooperation and assistance in keeping our water safe!
