Xylem Water Solutions USA, Inc. is pleased to provide a quote for the following Flygt equipment.

Flygt pump sized to match BEP of previously used hydromatic pump (560gpm @ 61.5'TDH)

Design duty point of station was 500gpm @ 37'TDH
Both the hydromatic and Flygt pump selections are oversized for current duty, but sized with expected increased flows with upcoming neighborhood and lift station additions.

Pumps should work with existing hydromatic elbows. If they do not mate, I've selected ANSI drilled flanges, so you can remove slide bracket and bolt on hydromatic flange.

Guide rail and installation by Dahme.
Our tech to perform pump startup checks.
